EL Cable allows for complete customization of your case. EL Wire is the latest advancement in EL technology. It is flexible and can be bent at any angle, unlike EL Lightstrip which can only be bent in two directions. The possibilities for this product are endless, such as keyboard mods, mouse and case mods.

The EL Cable use electroluminescent wire. It has a central copper wire with a phosphorus coating and two tiny transmitter wires wrapped around it. It is then covered by a PVC coating and finally a colored vinyl coat.

## Features:

- ✓ Highest Quality EL Lighting available.
- ✓ Area of illumination is almost twice as large as other brands.
- ✓ No soldering required provides 360 degree of illumination.
- ✓ It can be cut to any length and the cuttings can be re-used.
- ✓ It is safe and gives off no heat.
- ✓ Not fragile.

## Specifications:

Inverter input DC voltage	: 3V ~ 12V
Inverter output AC voltage	: 100V ~ 250V
Operating frequency	: 50Hz ~ 3000Hz
Brightness	: 30cd/m ~ 126cd/m
Standard wire diameter (mm)	: 0.9 / 1.3 / 2.3 / 3.2 / 4.3 / 5.0
