Answering the need for high-performance solutions to original equipment manufacturers (OEMs) and retrofit panel mount applications, **LEDTRONICS** offers an extensive line of direct incandescent replacement **Panel Mount LED Lamps and Holders** that fit control panels and operating budgets alike.

Panel Mount LED Lamps and Holders come in snap-in, bolt-on, hardware-mounted and relampable versions. With many behind-the-panel depths available, **LEDTRONICS** Relampable Panel Mount LED Lamps and Holders (RPLH) are excellent choices for applications where space is restricted and aesthetics a consideration. LEDs are available in sunlight-visible colors such as red (660nm), orange (610nm), yellow (595nm), green (525nm), blue (470nm) and white (8000k). **LEDTRONICS** Panel LED Lamps and Holders can be employed in utility monitoring boards, industrial control equipment, audio and intercom panels, broadcast equipment, nuclear power status stations, medical instrumentation, etc. . . .

Like the incandescent bulbs commonly used in panel mount applications, **LEDTRONICS**® RPLH Series LED lamps feature T3-1/4 (9mm) single-contact miniature bayonet bases that give installation a familiar twist. RPLH Series LED lamps are rated for 28VDC. They directly replace 28MB, 313, 757 and 1819MB series incandescent bulbs. Light colors available are Red, Orange, Yellow, Green, Blue and White. All colors are sunlight visible!

While intended as integrated assemblies that incorporate a lens, lamp and lamp holder, Panel LED Lamps and Holders may be purchased as separate components. Raised Lexan™ fresnel lenses resist impact, optimize viewing, maximize light dispersion and come in a variety of colors. Designed for screw-on mounting, lenses are independent of the lamp fixtures enabling lenses and the LED lamps to be easily changed. Lenses and holders are made of a rugged, polycarbonate (UL class UL94Vx) that withstands the rigors of industrial environments. Holders incorporate captive terminal screws with self-lifting, pressure wire clamps that accept up to two 14-gauge wires. Lamp holders are rated for incoming voltages of 5V DC or AC to 240V DC or AC. **LEDTRONICS** Panel Mount LED Lamps and Holders are available for 16mm, 22mm, 30mm, 1 1/16-inch, bi-pin cartridge, 15/32-inch, 5/16-inch and 1/2-inch panel openings.

LEDs' solid-state design renders them impervious to shock, vibration, frequent switching and environmental extremes, and ideal for rugged industrial applications. With an average life span of 100,000-plus hours (11 years), LED lamps operate more than 30 ÷ 50 times longer than the equivalent incandescent lamp! Savings from reduced maintenance costs and downtime quickly return the capital investment expenditure. LED lamps produce almost no heat and require 80% -- 90% less operating power than equivalent incandescents, making them as friendly to the environment as they are to the operating budget.

Will the Panel LED replace another manufacturer's parts? Dialight, Data Display Products, Industrial Devices Inc., etc...
If so, what is the part number?

Mounting Type? Snap-in, Snap-in with mount clip, Bolt-on, Relampable, etc...

Mounting Diameter & Panel Thickness? What is the hole diameter into which the lamp assembly must fit? How thick is the wall of the panel?

Operating Voltage and Polarity? Actual open line voltage? AC or DC? Does it fluctuate?
Indicate the Minimum/Maximum values?

Terminal Type? Are solid wire (0.02 sq.), pigtail flexible wire lead (24AWG), quick disconnect (3/16 rectangular), solder lug, turret, or screw-on type terminals preferred?

Viewing Distance? How far is the operator / technician when the indicator must be visible? 5 to 10 feet, 20 to 50 feet, 100 to 200 feet, 500 to 1000 feet?

Viewing Angle? 0 to 12 degrees – Narrow Beam
30 to 60 degrees – Medium Beam
100 to 160 degrees – Wide Beam

LED Color? Ultra Red, Hi-Efficiency Red, Standard Red, Orange, Yellow, Cool white, Ultra Green, Aqua Green, Blue

Lens Type? Diffused lenses are used in applications where direct viewing or indication is needed. Clear lenses are used in application where illumination is needed. Is the lens fluted?

Ambient Lighting? Standard office lighting. High ceiling factory lighting. Indirect sunlight. Direct sunlight

Potential Quality and Target Price? How many pieces are required within a given time frame?
How much budgetary funding is allowed for this item or project?

About your application

Mounting Hole Diameter 5/32 [4.0mm] 3/16 [4.8mm] 1/4 [6.4mm] Other _____
 9/32 [7.2mm] 5/16 [8.0mm] 1/2 [12.7mm]

Panel LED type Snap In Hardware Mounted Relampable Other _____

Terminal type Wire-lead _____ Square/Round Other _____

Lens Style Top Hat Cyl. Flat Cyl. Dome Other _____

Lens/LED color Red Orange Amber Yellow White Green Blue Other _____

Lens/Filter type Clear Diffused Lens size _____

Operating voltage (max) 5V 12V 24V 28V 120VAC Other _____

Voltage (type) AC DC Bipolar

Is an external resistor in series with the lamp Yes No If yes, Ohms _____ Watts _____

Ambient lighting conditions Indirect sunlight Direct sun Office Lowlight Darkroom

Maximum viewing distance desired 1 ft 5 ft 10 ft 20 ft 50 ft Other _____

Maximum viewing angle desired Straight on 30° 60° 90° Other _____

What is the source voltage? (If higher than the operating voltage of the lamp) _____

Would like updated literature Yes No More info on: Based Panel PCB Discrete Other _____

Applicable statutory and regulatory requirements Yes No Doc. No. _____

Additional Notes/Sketches

Snap-In Panel Mount LED Lamps

Features

- Panel Mounting Diameters from 5/32" (4.0mm) to 5/16" (8.0mm)
- Long Life 100,000+ hrs (10 years)
- Solid-State, High Shock/Vibration Resistant
- Maintenance Free, Easy Installation
- Low Power Consumption, High Intensity
- Diffused or Clear Lens
- Choice of High-Efficiency or Sunlight-Visible Super Intensity
- Built-in Current Limiting Resistor

Options

- Special Voltages
- Special Wire Lead Lengths
- Bi-Colors, Tri-Colors, RGB, IR
- Flashing / Blinking
- High Power Infrareads 850/880/940nm

5/32" (4.0mm) Snap-in Panel Mount LEDs

3/8" Relampable Panel LED Lamps

Features

- 3/8" (9.5mm) Panel Mtg Diameter
- Industry Standard Bi-Pin Cartridge and Socket
- Long Life 100,000+ hrs (10 years)
- Solid-State, High Shock/Vibration Resistant
- Maintenance Free, Easy Installation
- Meets MIL-L-3661B. Conforms to MS18235,6,7,8
- Low Power Consumption, High Intensity
- Major Power Savings
- Major Reduction in Heat Generation
- Built-in Current Limiting Resistor

Options

- Special Voltages
- Sunlight-Visible Super Bright or High-Efficiency LEDs
- Bi-Colors, Tri-Colors, RGB, IR
- RFI/EMI, Splashproof
- Flashing/Blinking

3/8" (9.5mm) Top Hat/Cylindrical Lens

22mm Low-Cost Panel Mount LED Indicators

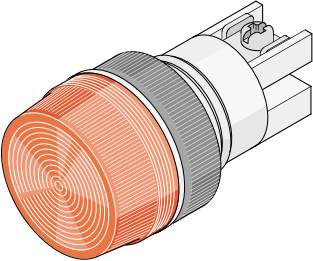

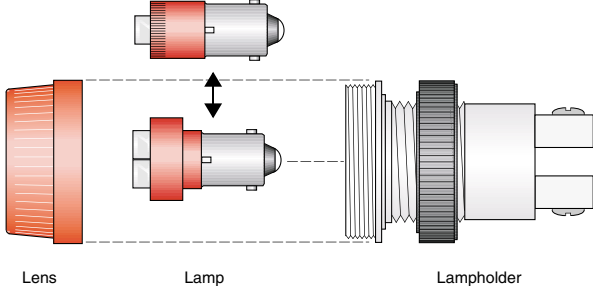

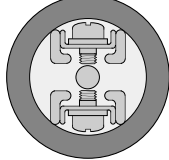

Features

- Panel Mounting Diameter 22mm (7/8 in.)
- Low-Cost Replacement to Industry Standard 22mm Pilot Lights
- Long Life 100,000+ hrs (10 years)
- Solid-State, High Shock/Vibration Resistant
- Maintenance Free, Easy Installation
- Combination Terminals
- Low Power Consumption, High Intensity
- Major Power Savings
- Major Reduction in Heat Generation
- Built-in Current Limiting Resistor

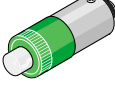

Options

- Special Voltages/Cluster
- Sunlight-Visible Super Bright or High-Efficiency LEDs
- Bi-Colors, Tri-Colors, RGB, IR
- Splash Proof - Moisture Proof
- Non-Relampable Models Available
- Flashing / Blinking
- Diffuser (For Use with Legend Inserts)

PilotLED® RPLH Panel Mount Lamp Assemblies

Simply the Best

LEDTRONICS products are engineered to be the best in quality and performance. Working with years of field-learned knowledge, each product is designed for the environment in which it is to operate. Designed for screw-on mounting, lenses are independent of the lamp fixtures enabling lenses and the LED lamps to be easily changed. Lenses and holders are made of a rugged, polycarbonate (UL class UL94Vx) that withstands the rigors of industrial environments.

The RPLH series PilotLED Panel Mount Line is a fully integrated modular system that offers a variety of sizes, lens colors and voltages. LEDs are available in sunlight-visible colors such as red (660nm), orange (610nm), yellow (595nm), green (525nm), blue (470nm) and white (8000k). Holders incorporate captive terminal screws with self-lifting, pressure wire clamps that accept up to two 14-gauge wires.

Series RPLH16

Series RPLH22

Series RPLH30

Features

- Maintenance Free
- Long life / 100,000+ hours
- Solid state, high shock / vibration resistant
- Easy installation; easily modified
- Lamp holders meet UL industrial control E110070
- 1-year warranty
- Major cost savings
- Six colors available
- Reduces power consumption up to 80%

Applications

With many behind-the-panel depths available, LEDtronics Relampable Panel Mount LED Lamps and Holders (RPLH) are excellent choices for applications where space is restricted and aesthetics a consideration. LEDtronics Panel LED Lamps and Holders can be employed in utility monitoring boards, industrial control equipment, audio and intercom panels, broadcast equipment, nuclear power status stations, medical instrumentation, etc. . . .

The lampholders are made of high quality Rynite moldings UL class UL94V0

Lens for the pilot lights are completely independent of the mount of the pilot light holder. They can be added or replaced at any time.

Lens - Fresnel design - Polycarbonate (Lexan) Material

Color - Amber, Blue, Clear, Green, Red, White, Yellow

Lampholders are UL listed industrial control E110075

Choice of Lens Colors

* Volts = full voltage. Customer defines incoming voltage, lamp in holder is made to that voltage. This holder contains no current limiting resistor. (Example RPLH16-24-01-02 [24 volt incoming source])

** 48 & 130VDC use an internal series resistor to drop the voltage across the LED bulb to 28 volts.
