- Structure Silicon Monolithic Integrated Circuit
- Product 7 x 7 Matrix LED DRIVER for Mobile Phone
- Type BH6948GU
- Figure

1. Highly effective Charge Pump circuit that can be switched 1 time, 1.5 times, and 2 times pressure automatically. (190mA / MAX)
2. 7-channel LED DRIVER that can contorol PWM (IoMAX = 31mA/ch, Current step = 1mA)
3. 7-channel PMOS-SW controlled with 1/8TDMA
4. It is possible to make 49(7X7) LED shine by PMOS-SW and the LED driver
5. SPI Interface
6. Wafer Level CSP pacage for space constrained applications 62pin (4.1mm×4.1 mm height = 1.0mm-max)

● Absolute Maximum Ratings (Ta = 25℃)

Parameter	Symbol	Rating	Unit
Maximum Supply Voltage	V_{MAX}	5.5	V
Power Dissipation ※	Pd	1.47	W
Operating Temperature Range	T_{opr}	-30～+85	℃
Storage Temperature Range	T_{stg}	-55～+125	℃

※ When using more than at Ta=25℃, it is reduced 14.7mW per 1℃.
When RHOM specification board 50mm X 58mm mounting.
Cautions : A device may be destroyed when it is used on the conditions beyond this value. Moreover, the usual operation is not guaranteed.

● Operating Conditions

Parameter	Symbol	Range	Unit	Block
VBAT1 Voltage ※1	V_{BAT1}	3.15～4.5	V	VREF/BGR
VBATCP Voltage ※1	V_{BATCP}		V	DCDC
DVDD1 Voltage ※2	V_{DVDD1}	1.7～3.1	V	I/O
DVDD2 Voltage ※2	V_{DVDD2}	2.7～3.1	V	Logic

※1 49LED lighting
※2 DVDD1 ≦ DVDD2

◎This product is not especially designed to be protected from radioactivity.

Status of this document.

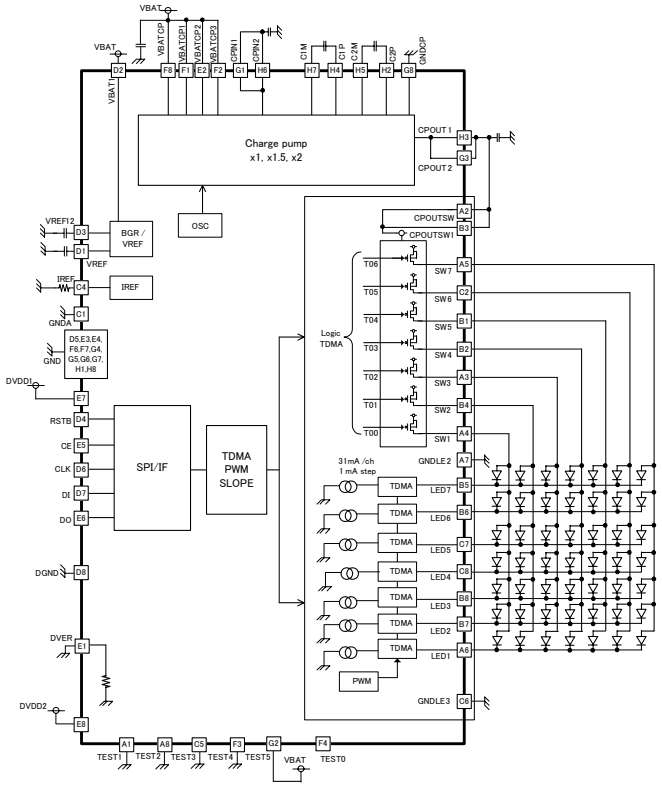
A customer may use this translation version only for reference to help reading the formal version.
If there are any differences in translation version of this document, formal version takes priority.

● Electrical Characteristics

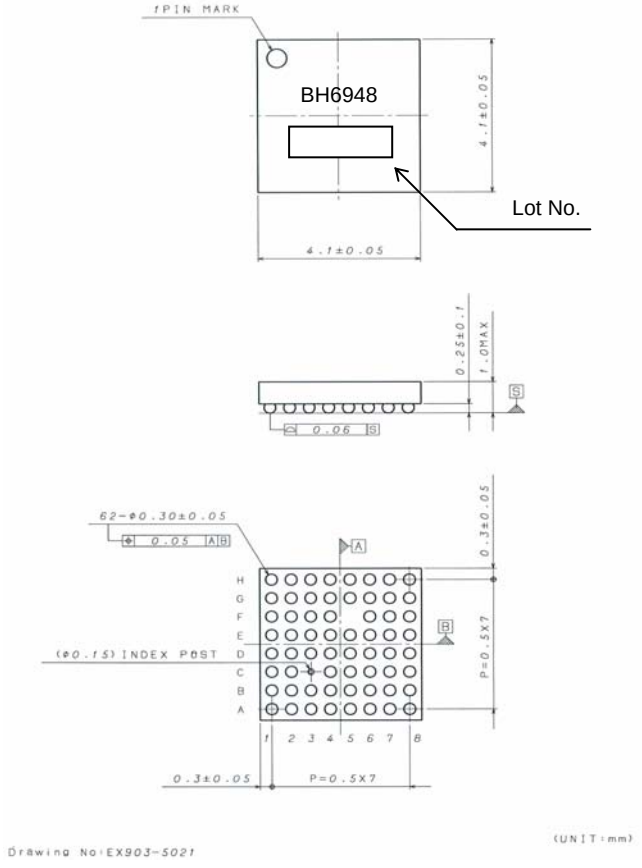
(Unless otherwise specified, Ta=25℃,VBAT1=VBATCP=VBATCP1-3=3.6V,DVDD1=1.8V,DVDD2=2.85V)

Parameter		Symbol	Spec			Units	Condition
			MIN	TYP	MAX		
Circuit Current	Stand-by Circuit Current	I_{ST}	-	0	8.8	uA	Stand-by mode (RSTB="H")
	DC-DC Converter Current1	I_{QCP1}	-	0.93	1.4	mA	1times mode
	DC-DC Converter Current2	I_{QCP2}	-	6.4	9.6	mA	1.5times mode (CPOUT=4.75V)
	DC-DC Converter Current3	I_{QCP3}	-	4.8	7.2	mA	2times mode (CPOUT=4.75V)
DCDC Converter	CPOUT Voltage1	V_{CP1}	4.55	4.75	4.95	V	1.5times mode No Load
	CPOUT Output Current1	I_{CP1}	-	-	190	mA	1.5times mode, VCPOUT>4V 49 LED lighting
	CPOUT Voltage2	V_{CP2}	4.55	4.75	4.95	V	2.0times mode No Load
	CPOUT Output Current2	I_{CP2}	-	-	190	mA	2.0times mode, VCPOUT>4V 49 LED lighting
	CPOUT Voltage3	V_{CP3}	5.1	5.3	5.5	V	1.5times mode No Load
	CPOUT Output Current3	I_{CP3}	-	-	190	mA	1.5times mode, VCPOUT>4V 49 LED lighting
	CPOUT Voltage4	V_{CP4}	5.1	5.3	5.5	V	2.0times mode No Load
	CPOUT Output Current4	I_{CP4}	-	-	190	mA	2.0times mode, VCPOUT>4V 49 LED lighting
	Oscillator Frequency	fosc	0.96	1.20	1.44	MHz	
PMOS Switch	Leak Current when OFF (SW1～7 total)	I_{LEAKP}	-	-	7.0	μA	When 35H(MATRIXCNT)bit0(START)=0
Current Driver (Lo-Mode, LED1~7)	Output Current1	I_{O1}	-8.5	-	+8.5	%	I=1mA Setting
	Output Current2、3	I_{O2}	-8.0	-	+8.0	%	I=2～3mA Setting
	Output Current4～31	I_{O4}	-7.0	-	+7.0	%	I=4～31mA Setting
	Output Current matching1	Mat1	-	-	11.5	%	I=1～3mA Setting, Mat1=(IoMax-IoMin)/IoMinx100
	Output Current matching2	Mat2	-	-	10	%	I=4～31mA Setting Mat2=(IoMax-IoMin)/IoMinx100
	Leak Current when OFF (SW1～7 total)	I_{LEAK}	-	-	7.0	uA	When 35H(MATRIXCNT)bit0(START)=0
Current Driver (RGB with PWM : LED1~7)	PWM on duty1	PWMD1	1.54	5.04	8.54	%	PWM1～7SET=5digit
	PWM on duty2	PWMD2	43.7	47.2	40.7	%	PWM1～7SET=32digit
	PWM on duty3	PWMD3	84.6	88.1	91.6	%	PWM1～7SET=58digit
Under Voltage Lockout	UVLO Threshold	V_{UVLO}	2.0	2.25	2.6	V	VBAT falling
	UVLO Hysteresis	V_{UVLO}	50	100	150	mV	
Soft-Start	SS Mode Time	T_{SS}	1.6	2.0	2.4	ms	
Short Circuit Protector	SCP Threshold	V_{SCP}	1.0	1.2	1.4	V	CPOUT falling
	Delay Time	T_{DLY}	8	10	12	mS	
	Reset Time	T_{RST}	80	100	120	mS	
Over Current Protector	OCP Threshold	I_{OCP}	-	790	-	mA	
Over Voltage Protector	OVP Threshold	Vovp	5.50	5.62	5.74	V	
LED Dropout Detector	Detect Voltage	V_{DR}	0.36	0.40	0.44	V	
SPI I/F	Input "H" Level	V_{IH}	1.4	-	DVDD1 +0.3	V	
	Input "L" Level	V_{IL}	-0.3	-	0.4	V	
	"H" Level Input Current	I_{IH}	-	0	1	uA	
	"L" Level Input Current	I_{IH}	-	0	1	uA	
RSTB	Input "H" Level	V_{IH}	1.4	-	DVDD1 +0.3	V	
	Input "L" Level	V_{IL}	-0.3	-	0.4	V	
	"H" Level Input Current	I_{IH}	-	0	1	uA	
	"L" Level Input Current	I_{IL}	-	0	1	uA	

● Block Diagram



● Package Outline



● Terminal List

FBGA62R1 BALL Name	FBGA62R1 BALL No.	FUNCTION
TEST1	A1	Test terminal 1 (※ Please be sure connect to GND)
CPOUTSW	A2	Power supply for SW1～7
SW3	A3	P-MOS SW3 output
SW1	A4	P-MOS SW1 output
SW7	A5	P-MOS SW7 output
LED1	A6	LED1 driver output
GNDLE2	A7	GND for LED1～3
TEST2	A8	Test terminal 2 (※ Please be sure connect to GND)
SW5	B1	P-MOS SW5 output
SW4	B2	P-MOS SW4 output
CPOUTSW1	B3	Power supply for SW1～7
SW2	B4	P-MOS SW2 output
LED7	B5	LED7 driver output
LED6	B6	LED6 driver output
LED2	B7	LED2 driver output
LED3	B8	LED3 driver output
GNDA	C1	GND for VREF, IREF
SW6	C2	P-MOS SW6 output
IREF	C4	LED Constant Current Driver Current setting Terminal
TEST3	C5	Test terminal 3 (※ Please be sure connect to GND)
GNDLE3	C6	GND for LED4～7
LED5	C7	LED5 driver output
LED4	C8	LED4 driver output
VREF	D1	Stabilization Power Supply for IREF, VSATDET, OSC
VBAT1	D2	Power supply for BGR, VREF, SCP
VREF12	D3	Standard for OSC, VSATDET, IREF
RSTB	D4	Reset terminal
GND	D5	GND terminal
CLK	D6	4 line serial interface CLK
DI	D7	4 line serial interfac DATAIN
DGND	D8	GND for internal logic
DVER	E1	Device version
VBATCP2	E2	Power supply for charge pump
GND	E3	GND terminal
GND	E4	GND terminal
CE	E5	4 line serial interface CE
DO	E6	4 line serial interface DATAOUT
DVDD1	E7	Power supply for interface
DVDD2	E8	Power supply for internal logic
VBATCP1	F1	Power Supply for Charge Pump Section
VBATCP3	F2	Power Supply for Charge Pump Section
TEST4	F3	TEST terminal 4 (※ Please be sure connect to GND)
TESTO	F4	Test output terminal (※ Please should be left open when used)
GND	F6	GND terminal
GND	F7	GND terminal
VBATCP	F8	Power Supply for Charge Pump section
CPIN1	G1	Power Supply for Charge Pump section Step-up Voltage Circuit
TEST5	G2	TEST terminal 5 (※ Please be sure to connect to VBAT)
CPOUT2	G3	Charge Pump section Constant Voltage Output
GND	G4	GND terminal
GND	G5	GND terminal
GND	G6	GND terminal
GND	G7	GND terminal
GNDCP	G8	GND for Charge pump section
GND	H1	GND terminal
C2P	H2	Charge Pump section Flying Capacitor2 on Side of Plus
CPOUT1	H3	Charge Pump section Constant Voltage Output
C1P	H4	Charge Pump section Flying Capacitor1 on Side of Plus
C2M	H5	Charge Pump section Flying Capacitor2 on Side of Minus
CPIN2	H6	Power Supply for Charge Pump section Step-up Voltage Circuit
C1M	H7	Charge Pump section Flying Capacitor1 on Side of Minus
GND	H8	GND terminal

● Use-related Cautions

(1) Absolute maximum ratings

If applied voltage (V_{MAX}), operating temperature range (Topr), or other absolute maximum ratings are exceeded, there is a risk of damage. Since it is not possible to identify short, open, or other damage modes, if special modes in which absolute maximum ratings are exceeded are assumed, consider applying fuses or other physical safety measures.

(2) Power supply lines

In the design of the board pattern, make power supply and GND line wiring low impedance.
When doing so, although the digital power supply and analog power supply are the same potential, separate the digital power supply pattern and analog power supply pattern to deter digital noise from entering the analog power supply due to the common impedance of the wiring patterns. Similarly take pattern design into account for GND lines as well.

When there is a small signal GND and a large current GND, it is recommended that you separate the large current GND pattern and small signal GND pattern and provide single point grounding at the reference point of the set so that voltage variation due to resistance components of the pattern wiring and large currents do not cause the small signal GND voltage to change. Take care that the GND wiring pattern of externally attached components also does not change.

Furthermore, for all power supply pins of the LSI, in conjunction with inserting capacitors between power supply and GND pins, when using electrolytic capacitors, determine constants upon adequately confirming that capacitance loss occurring at low temperatures is not a problem for various characteristics of the capacitors used.

(3) GND voltage

Make the potential of a GND pin such that it will be the lowest potential even if operating below that. In addition, confirm that there are no pins for which the potential becomes less than a GND by actually including transition phenomena.

(4) Shorts between pins and misinstallation

When installing in the set board, pay adequate attention to orientation and placement discrepancies of the LSI. If it is installed erroneously, there is a risk of LSI damage. There also is a risk of damage if it is shorted by a foreign substance getting between pins or between a pin and a power supply or GND.

(5) Operation in strong magnetic fields

Be careful when using the LSI in a strong magnetic field, since it may malfunction.

(6) Input pins

Parasitic elements inevitably are formed on an LSI structure due to potential relationships. Because parasitic elements operate, they give rise to interference with circuit operation and may be the cause of malfunctions as well as damage. Accordingly, take care not to apply a lower voltage than GND to an input pin or use the LSI in other ways such that parasitic elements operate. Moreover, do not apply a voltage to an input pin when the power supply voltage is not being applied to the LSI. Furthermore, when the power supply voltage is being applied, make each input pin a voltage less than the power supply voltage as well as within the guaranteed values of electrical characteristics.

(7) Externally attached capacitors

When using ceramic capacitors for externally attached capacitors, determine constants upon taking into account a lowering of the rated capacitance due to DC bias and capacitance change due to factors such as temperature.

(8) Thermal shutdown circuit (TSD)

When the junction temperature becomes higher, the thermal shutdown circuit operates and turns the switch OFF. The thermal shutdown circuit, which is aimed at isolating the LSI from thermal runaway as much as possible, is not aimed at the protection or guarantee of the LSI. Therefore, do not continuously use the LSI with this circuit operating or use the LSI assuming its operation.

(9) Thermal design

Perform thermal design in which there are adequate margins by taking into account the permissible dissipation (Pd) in actual states of use.

(10) Test terminal and unused terminal processing

Please process a test terminal and unused terminal according to explanations of the function manual and the application note, etc. to be unquestionable while real used. Moreover, please inquire of the person in charge of our company about the terminal without the explanation especially.

(11) Rush current

For ICs with more than one power supply, it is possible that rush current may flow instantaneously due to the internal powering sequence and delays. Therefore, give special consideration to power coupling capacitance, power wring, width of GND wiring, and routing of wiring.

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the product described in this document are for reference only. Upon actual use, therefore, please request that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard use and operation. Please pay careful attention to the peripheral conditions when designing circuits and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or otherwise dispose of the same, no express or implied right or license to practice or commercially exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).
Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of which would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.
It is our top priority to supply products with the utmost quality and reliability. However, there is always a chance of failure due to unexpected factors. Therefore, please take into account the derating characteristics and allow for sufficient safety features, such as extra margin, anti-flammability, and fail-safe measures when designing in order to prevent possible accidents that may result in bodily harm or fire caused by component failure. ROHM cannot be held responsible for any damages arising from the use of the products under conditions out of the range of the specifications or due to non-compliance with the NOTES specified in this catalog.

Thank you for your accessing to ROHM product informations.
More detail product informations and catalogs are available, please contact your nearest sales office.
